

INFORMATION ON THE CONTROLLED SUBSTANCES PRESCRIPTION MONITORING PROGRAM (CSPMP) – Exhibit 17-3

What is the purpose of the CSPMP?

A.R.S. § 36-2602 requires each medical practitioner who is licensed under Title 32 and who possesses a DEA registration to also possess a current controlled substances prescription monitoring program registration issued by the Board. This registration includes: MD, DO, DDS, DMD, DPM, HMD, PA, NP, ND, and OD. The purpose of this legislation is to improve the State's ability to identify controlled substance abusers or misusers and refer them for treatment, and to identify and stop diversion of prescription controlled substance drugs in an efficient and cost effective manner.

The computerized central database tracking system tracks prescribing, dispensing and consumption of Schedule II, III, IV controlled substances in Arizona

Who is required to register to use the CSPMP?

Per Arizona State statute 36-2606.

Registration Requirements:

Beginning November 1, 2007 and pursuant to rules adopted by the board, each medical practitioner who is issued a license pursuant to title 32 and who possesses a registration under the federal controlled substances act must have a current controlled substance prescription monitoring program registration issued by the board.

Who can have access to the CSPMP?

Medical Practitioners - information concerning a current or prospective patient or controlled substance information filed under that practitioner's DEA number.

Pharmacists – information related to a patient when a controlled substance prescription is presented to be filled.

Patients – individuals can request their own prescription information.

Boards – Professional licensing boards for complaints/investigation of a licensee.

Law Enforcement – Federal, State, and local law enforcement authorities on an authorized investigation.

AHCCCS – Administrative authorities for a complaint or investigation of persons receiving services.

***Note: Registration and Access are two different things. Registration is required by law. Access is not required by law, but is recommended.**

What is the CSPMP utilized for?

- 1) Assists law enforcement in identifying potential illegal activity related to prescribing, dispensing and consumption of these medications.
- 2) Provides information to patients, medical practitioners and pharmacists to help avoid inappropriate use of these medications.
- 3) Minimizes inconvenience to patients, prescribing medical practitioners and pharmacies while effectuating collection and storage of this information.

Use the PMP report as a *tool*.

- Review any additional records available.
- Validate unexpected information.
- Contact prescribers or pharmacies listed for more details
- Review the patient's history and patterns of drug use.
- What a patient received over the last 6-12 months is more important than what they got last week.

How to ACCESS the CSPMP:

The CSPMP can be accessed at the following website:
